Good Evening Jack,  
Glad to hear from you.  
Know how deluged you are. I admire your tenacity!  
You've given some great food for thought. I knew I could count of you for pragmatism.  
Will think on this and get back to you.  
Thank you big time Jack!  
Roni

Subject: We Either Hang Together or Hang Separately - Networking Push to teach kids..." & Leon Coffee/Dr's Soon & Legates

Excellent letter Roni. I am working on a web site documentary on the State of Washington Constitution That Never Was. Turns out the political insiders running the territory throw out the legitimate 1878 constitution and rewrote a new one in 1889 scrubbing out all the key property rights, et al. Its an amazing story. An brave paralegal filled over 100 pages affidavit in the adjoining county court about all this constitutional shell game. What I am also stumbling on is all the state constitutions are NOT frameup as true and honest Constitutional Republics. They are drafted more as demonic democracy at best and muni corporations by-laws at worse.

Also I wanted to rely to an old email asking Ron and I to sponsor a Good Neighbor gathering. *I thought about this a lot. I am tied up 24 x 7 with Mom, I carry a monitor around wherever I go on the "ranch" as she continues to decline. When I do escape Stephanie backs me up or I run out on a quick errand for a half hour.*

*However here is an idea. Tim Eyman who is considered the Initiative King in the state that never was Washington has some 18,000 on his email list and they operate out of Spokane on the east side of the state where there is more common sense. Citizens Alliance For Prop Rights is growing to some 13 chapters though small ones. Our last banquet was 200 normally over 400 but down due to depression so I was told. Think of it, it down to the low of deciding if you want to feed yourself or protect your property.*

*I have attached a Work in Process over the last 5 years on American groups who directly and indirectly support property rights. This one is sorted by WA state where I took the time to add that category. Feel free to update this and use it and send me back your updates and I will try to be the keeper of the master Excel sheet.*

*What I would love to do is network all of these groups together into legends of property rights "Angels" to rescue us all not unlike the picture above.*

*Better said, Ron and I alone , in my humble opinion could not muster the attendance numbers necessary to pull off a state wide property*

11/1/2010

*rights bash. However comma, Tim Eyman, Evergreen Freedom Foundation, CAPR chapters all over the state, and all the other Washington State pro property rights groups make a public splash.*

*What do you think? Sorry for the delay, I have been thinking although slower each day.....*

Jack

Dear Nancy,

Thank you again, for writing such a terrific article "...teach kids other side..."  
[http://www.denverpost.com/technology/ci\\_15161879](http://www.denverpost.com/technology/ci_15161879)

Enjoyed our phone visit.

If you scroll down a bit here \*<http://ronibell.blogspot.com/> you'll find the letter to East H.S.

Dr.'s Soon and Legates...and Leon Coffee are excited about the prospects of working together -visiting schools from Denver to Cheyenne in Oct.

It would be very telling to find out how many children in CO (and the U.S.) have been ostracized, bullied, ridiculed, and physically shoved by students and teachers (as have the two I mentioned to you) - just for explaining findings contraire to Mr. Gore's CO2 theory.

For facts, truth and dispassionate findings by scientists, please go to:  
[www.LandAndWaterUSA.com](http://www.LandAndWaterUSA.com) Because it's run solely by volunteers (no paid staff.)  
- it's most likely the purest "go to place" for such on the WWW.

Any information you need, holler! We'll seek it out and get it to you.

Our passion is "keeping domestic resource production alive," therefore - "protect our domestic resource providers!"

Because policies connected to climate change/CO2 theories/global warming (see cap and trade as one example), are extremely destructive to domestic resource providers - and jeopardize our national security - our mission is to stop and or get them rescinded!

I made a personal commitment to force eco-activists and their political partners to return "science" to the scientists, and federal grant monies to us taxpayers!

Roni
