Dear Sierra Club Cascade Chapter, LLOWW, King County Council, AWC, CELP, WEC, Audubon, Media, Olympia House and Senate, Property Owners, Freedom Foundations. Paul Allen::

Amen to Ron Ewart's thoughts below.

US property owners are all fed up with these green horror distortions. Reading the Sierra Club depiction of the Property Fairness Initiative would make you think you were going to see an old time horror movie starring Vincent Price or Peter Lorre.

<http://cascade.sierraclub.org/node/556> What Sierra Club needs to do is read the attached facts in Oregon from Measure 37 and relax, go take a bike ride on an urban stolen land trail or chop down a few trees and get your frustrations out. Let freedom take its course. Your fears are all self created. Chill out. Get a real job.

The green city community would have you believe that every farmer in the local Washington Farm Bureau is a big developer and that every one of us rural property owners do not have any rights to do anything with our land. They would have you believe that this Property Fairness Initiative (1933) has nothing to do with constitutional freedoms given to us under the State and U.S. Constitution. They don't think we know we are being raped. They would have you believe that this has nothing to do with the outrageous taking of land all over America by radical environmentalism who are in bed with certain political parties and the green branches of government. They don't want you to know that every property owner in America is fed up with this green bile.

The greens won't tell you they are funded to the tune of 10 billion dollars

10/20/2010

and their money flows from east to west. They won't tell you that the Farm Bureau or all the small individual rural land owners or Americans for Limited Government used their own money. The greens of course would get a grant from the government and sue the government to get what they wanted using our money that we would never give them ourselves. This is how mutated and incestuous our government has become. They won't tell you their whole concept of green scarcity is a myth, e.g. sustaining development, smart growth, wetlands, critical area ordinances, growth management, ESA, urban sprawl and fish and water scarcity and even global warming. The facts have been distorted so much that the environmental movement is a house of green cards. The foundation of the environmental movement is based on junk science and political extortion.

If your still confused you can ask the 1500 land owners receiving tickets each year from the King County DDES for not looking urban enough. Or ask any of the 30,000 property owners who have filed a class action suit against King County for land use extortion. Ask Pacific Legal Foundation why they are suing King County for filing a CAO against their very own rural citizens who not only did not want it but took it to the Supreme. Ask any of US property owners why the King County forced CAO is before the Washington Supreme Court right now. Its because King County Executive Ron Sims and his green council and the 1000 Friends of Washington and CELP all want to steal our land but not pay for it. If they had to pay for it they wouldn't steal it. That's what this is all about. They 'forgot' the Washington and US Constitution requiring them to pay US.

Green extreme abhors the free market and the constitution and private property. They detest the basic building blocks of a free nation. They just hate to pay for anything themselves that they can steal from US for free. That is why the environmental movement has been so successful in making powerful allies with the United Nations, creating Agenda 21 and the International Forum on Globalization (IFOG). If you think this is 'poppy cock' link here <http://www.sovereignty.net/p/ngo/ron.html>

That is why the government + UN + environmental extremism work so well together, i.e. the green iron triangle. Stealing private property serves them all..

Government already owns 900 million acres or 40% of the land area in the US. Nearly 200 million are wilderness and off limits to humans. More than 50 bills

10/20/2010

have been introduced in Congress to expand the wilderness area and another 50 bills are now being considered to authorize more land takings. States and counties are doing the same. These land takings are not voted on or approved by the land owners. This movement of taking property is destroying our freedom in America and shifting more and more tax revenue onto the little property owners, removing large blocks of land from the private market, reducing & eliminating free use of the land. The greens are parking out rural King County and America and they are suing my neighbors for their county bike trials.

The United Nations and the 10 billion dollar environmental lobby and the super rich foundations such as Rockefeller Foundation, Ford Foundation, Solidago, Environmental Grantmakers Association, etc. all conspire to lay a green rail road so the locomotive of government & environmental taking can rail road all our freedoms. And it is done behind the backs of the private property owners without a public vote because they know they could never get the vote. These are closed door decisions or buy offs or extortion or thrown into other bills. Then they lie and distort the facts so the unaware and hard working Americans are easily deceived.

This is why groups such as Sierra Club, 1000 Friends of Washington, CELP, WA DNR, WEC and the Liberal League of Women do not want the voters in the state of Washington to vote on whether we want our property stolen by green urban government. These people want our rural land for their urban reasons based on junk urban science. These groups want you to ignore the constitution, ignore the theft of our land, ignore they are creating & causing the problem and they want US to blame the big developers. Did they tell you the zoning doesn't change and the cities still can annex anybody they want to and the big green developers get what they want anyway if they shake hands with the right government employee and hold hands with the greens. Forget the constitution and Property Fairness, the green iron triangle does what they want when they want and they 'gets what they wants." The rural property owners get screwed.

This is the big picture. The cities can annex and expand, the big green developers that shake hands with the government and the greens & develop anywhere they want. The big environmental groups like the Sierra Club, Nature Conservancy, etc. can suck up any big chunk of land where they want with the help of Paul Allen or King County or any green liberal government employee. But.....US little two

10/20/2010

bit, few acre rural land owners have to give up 50 - 65 % of our land use + the insane set back buffers from any water + limit our access surface + allow the county to rape US with higher assessments + higher taxes + less land use + brutal DDES assaults + permit extortion on any remodels or redevelopment of our land, etc.

Do you get the big picture on what is going on in King County and all over the U.S.A. now? It has nothing to do with big developers in the sense that is conveyed by Sierra Club or 1000 so called Friends of Washington or CELP. The 'big developers' are the big green iron triangle.

It is time to flick the bottom card on this green house of cards and throw away this old dirty green stained deck and deal a new hand to this great free nation. This time the deck is not going to be stacked and the colors are going to be Red, White and Blue. The property owners are going to deal a new game. Its 5 card stud, Jacks are wild, anti up or get out of the game. There's a new Sheriff in town and US boys are watching you green card sharks real close. We know all your tricks.

God Bless America

 Subject: YES on I-933

Scott Brannon
 Cascade Chapter
 Sierra Club

Re: YES ON I-933, the Property Fairness

Initiative.

Dear Scott:

We just read your diatribe against I-933 on your website called a "***Life Boat for Big Developers***", **a lie**. So why is it Scott that environmental groups always stoop to lying to their constituents to propagandize an issue? To all you brainwashed "envirocrats", the environment trumps constitutional law. You don't give one wit about the core values of our country, only the God of environmentalism. You have become a cult, a religion, a fixation. It's the environment, no matter what some landowner has to give up. Screw the constitution, screw property rights, just so long as your precious environment is protected, at whatever cost, which you don't have to pay.

Now if we could just get every environmentalist to quit using cars, quit living in homes, quit buying food, quit using up valuable resources, that you want everyone else to do, well then maybe we actually could save what you call the environment. But you folks are like so many other self-righteous groups. You want to force your social and radical environmental agenda down everyone else's throat at their cost, not yours. You get off scot-free. What you really want is to send the rest of us back to the dark ages to save your precious environment. Well it ain't goin' to happen. Environmentalists have stopped just about every possible technology in bringing more energy to Americans. For over 25 years you have stopped drilling for oil, you've stopped power new

10/20/2010

generation and you've stopped new refinery capacity that would have kept the cost of our gasoline down and thwarted the oil cartels. But oh no, God forbid we should drill in ANWR. You've created an un-holy alliance with government. Some might call it a conspiracy. The cost to our economy for radical environmentalism is in the trillions of dollars and climbing and you don't care.

But you "envirocrats" are now worried. And you are going to have to spend a lot of money to get your lies and propaganda out to your brainwashed constituents in the next four months to stop I-933. Oregon passed Ballot Measure 37 with a 61% margin, that was unanimously upheld by the Oregon Supreme Court. You lost there and you put a lot of money into the fight. Washington's Initiative 933 will obviously share the same fate as Oregon's initiative. Landowners are tired of your environmental God that secretes like a black, smelly ooze coming out of high-dense urban areas, that you want everyone to live in. The Crescendo is rising Scott. Environmentalists have had their day. Your CAO's and your GMA's and your ESA's are in extreme peril. Now folks are beginning to wake up to your hidden agenda and they are fighting back. I-933 is going to win no matter how much money environmentalists throw at it.

Environmentalists have become a scourge on the land and need to be stopped in every way possible. I-933 is the beginning, but hardly the end. There is much more in store for environmentalists and they aren't going to like any of it. Stay tuned. More Americans are getting angry the more they learn about the hidden agenda of environmentalism.

What is it about the U. S. and State Constitutions that you and all the other mind-numbed environmental robots don't understand?

U. S. Constitution, 5th Amendment: nor shall any person be deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use, without just compensation.

Washington State Constitution, Article I, Section 16: Private property shall not be taken for private use, except for private ways of necessity, and for drains, flumes, or ditches on or across the lands of others for agricultural, domestic, or sanitary purposes. No private property shall be taken or damaged for public or private use without just compensation having been first made.....

Now why is it we have to pass an initiative for a constitutional right we already have? Why indeed!

10/20/2010

"Protecting the environment is laudable.
Trashing the Constitution to do it, is treasonous."

Ron Ewart
