To:

Senator Green Cantwell

Senator Murray

Representative Reichert

The Gang Green in Olympia, Washington, Seattle & King Communist County

Regarding your statement below extracted from your letter to me below:

"As you know, scientists have conclusively determined that an ongoing buildup of greenhouse gas emissions, including carbon dioxide, methane, and nitrous oxide, is causing the Earth's climate to warm and could lead to drought, flooding, and other catastrophic natural disasters"

This is a patent lie and complete one side hoax propagated by those who benefit from the grant money, i.e. academia, UN, environmental extreme and government. Hundreds of independent scientist with no stake in this green gagging game have debauched this long ago. I have attached attached some prior email articles on this subject for your study. This only a few of the 160 articles I have gathered over the years. Due to the size of the articles I cannot include them all. all. If you or your staff wish to have all of this research let me know and I will forward.

In fact we are in an epoch cooling trend with relatively diminished CO2. Just the opposite of your so called "scientist" claim. Check out the chart above. Your source of information is highly highly prejudiced, i.e. they are getting paid to generate outcome based research which goes against basic scientific community principals that all scientific research does not become accepted fact until there is a CONSENSUS AMOUNG INDEPENDENT PEER REVIEW. OTHER INDEPENDENT SCIENTISTS AND ENGINEERS MUST BE ABLE TO DUPLICATE THE FINDINGS BEYOND ANY QUESTION BEFORE A THEORY BECOMES BECOMES A FACT LET ALONE PUBLIC POLICY.

Your constant repetition of this same green mantra does not make it true. Your duty is to the truth and your oath of office not to distortion and lies to pander to and secure your own career. career. You offer no independent proof of these one side self profiting scientific distortions. You offer no references. You have no scientific credentials. Yet you are bragging about creating creating energy and jobs and feel good measures based on nonsense.

There is no such thing as "alternative energy". It is a green hoax costing and using more energy than producing. The only energy coming out of solar panels, wind turbines and fuel cells is the transfer of the wages of private property owners to the pockets of more corrupt green politicians, green contractors, green utility companies and green extreme groups.

GREEN GOVERNMENT POLITICIANS LIKE YOURSELF, GREEN A CEDEMI, GREEN EXTREME GROUPS AND GREEN CONTRACTORS

- **CANNOT CREATE COMMERCIAL VIABLE ENERGY OUT OF GREEN TINKER TOYS**
 - *E.G. SOLAR PANELS, WIND TURBINES, FUEL CELLS.*
 - *THESE TOYS CANNOT DELIVER HIGH AMPREAGE & VOLTAGE NECESSARY TO TO POWER HOMES ECONOMICALLY*
 - *THESE ARE GREEN TOYS SUBSIDIZED BY PEOPLE LIKE YOU TO EXTORT AND AND EMPEZZLE PRIVATE PROPERTY OWERS*
 - *GREEN SOURCES CANNOT STORE COMMERCIAL POWER TO ANY DEGREE OF OF EFFICIENCY TO BE USEFUL*
 - *NOR IS ARE THE SOURCES OF SUN AND WIND CONSISTENT*
 - *NOR IS THE INVESTMENT ECONOMICALLY FEASIBLE*
- **THROWING THE STATE AND FEDERAL GOVERNMENT INTO DEBT BRAGGING YOU ARE CREATING ENERGY IS A FRAUDULENT LIE**
- **YOU HAVE NO CONSTITUTIONAL MANDATE TO INVOLVE YOURSELF IN FREE MARKET ENERGY PRODUCTION**
 - **USING UNCONSTITUTIONAL DEBT AND ILLEGITIMATE TAXES UPON STATE CITIZENS**

- PUBLIC UTILITIES ARE PSEUDO GOVERNMENT CORPORATIONS WHICH ARE ILLEGITIMATE AND UNCONSTITUTIONAL
- YOU ARE ONCE AGAIN STEALING PRIVATE SECTOR BUSINESS
- LEAVE THE FREE MARKET ALONE, GET OUT OF OUR PRIVATE AND OUR BUSINESS LIVES
- YOU HAVE NO JURISDICTION TO APPROPRIATE FUNDING FOR ENERGY
- YOU HAVE NO AUTHORITY LET ALONE ABILITY TO MANAGE THE WEATHER
- YOU HAVE NOT BEEN GIVEN AUTHORITY BY ANY MAJORITY OF THE VOTERS OR PEER REVIEW INDEPENDENT CONSENSUS
 - TO PRODUCE OR TAKE OUT OF PRODUCTION ANY PUBLIC NATURAL RESOURCES
 - YOU DO THIS ONLY BY PANDERING TO THE FEDERAL GOVERNMENT SELF SELF FULLFILLING GREEN "SCIENCE"
- YOU ARE VIOLATING STATE SOVEREIGNTY BY TAKING FEDERAL BRIBES
- YOU ARE FURTHER BINDING THE STATE TO FEDERAL AND EASTERN GREEN EXTREME PIMPING POLICES
- YOU ARE CREATING INCREASED DEPENDENCY AND FURTHER INDEPTEDNESS VIA GOVERNMENT GRANT PARADIGMS
- YOU ARE VIOLATING YOUR OATH OF OFFICE TO KEEP US OUT OF DEBT
- YOU ARE VIOLATING YOUR OATH OF OFFICE BY STEALING PRIVATE PROPERTY AND WAGES OF HARD WORKING AMERICANS
 - VIA UNCONSTITUTIONAL PROPERTY TAXES
 - VIA UNCONSTITUTIONAL STATE SALES EXCISE TAXES DIRECTLY UPON NATURAL BORN FREE SOVEREIGN STATE CITIZENS
 - TO SUPPORT THIS GREEN HOAX
- YOU ARE TOTALLY IGNORANT OF BASIC AMERICAN FOUNDING PRINCIPALS
- YOU ARE TOTALLY IGNORANT OF BASIC ENGINEERING PRINCIPALS
- YOU AND YOUR GREEN MOVEMENT HAVE DEVASTATED AMERICAN WOOD AND ENERGY INDUSTRY
 - AS WELL AS THE LIVES OF MILLIONS OF AMERICANS
 - YOU GREEN DOGMATIC RELIGION HAS THROWN THIS COUNTRY BACK INTO THE DARK AGES

THE ONLY ECONOMICAL VIABLE SOURCES OF ENERGY ARE FOSSIL FUEL AND NUCLEAR.

Man's contribution to the green house gasses, most of which is water vapor, is only .017%, i.e. .00017.

- Climate changes are normal and have nothing to do with man.
- It is only in the minds of ignorant Political green gullible people like yourself and your staff staff
- who extort more private & public property pandering to your eastern extreme mega corporations

New scientific thinking is finding CO2 is coming off the ocean and life in the ocean, i.e. the current short warming cycle is because of natural emission of CO2 from ocean warming because because of the solar radiation cycles.

- To go off on these insane green legislating tangents stealing our private and public lands and and shutting down and over regulating our private and business lives is not only tyranny it is is treasonous.
- You and your office and 99.9% of government have no scientific or engineering credentials credentials to even think about this subject,
- let alone extort every private property owners and business owner in the land over your personal pathological green paranoia.
- Government technical types are no more legitimate or believable.
- They have a stake in the green taking game just like you to keep themselves employed.
- How hard is this to figure out?

Why do you think the University of Washington takes 10% of Washington State's budget of 20 20 billion. They are part of this closed loop paradigm that feeds itself and all the green iron triangle trying to create worthless programs out of nonsense tinker toys and Lincoln logs that they try to sell to the ignorant public who don't know the difference between one amp and a megawatt of power. I took the library of checking out some of the UW Electrical Engineering student projects a few years ago. None of them can create energy for real world commercial applications.

As long as you continue to propagate these green lies,

- America energy prices will rise and drive Americans to become home bound
- and food will become more unaffordable.
- There is absolutely no consensus that global warming is caused by man.
- In fact there is a stronger case that this is a natural warming trend in a long term cooling trend.
- UN modeling of our weather into the future is a total scam,
 - you cannot predict the future on the past
 - and especially for highly complex multiple variant systems such as weather and energy

To think you can guide such complex systems as our energy usage, weather, land use and social lives

- is to make a fool of yourself, your party and your state
- The forces that control us are called free choice, natural law and our unalienable rights
- You and your dam government have no control, no jurisdiction, no rights over our lives
- let alone those force we use to make our lives
- You can no longer manipulate our rights, our free choices, our land, our energy, our education and our privacy
- This is called stealing, trespassing, treason, invasion of privacy, violation of the 9th Amendment, to name a few
- You and your party and the government are warring on what God has given to us freely
- Most of government is now municipal corporations which make the takings even more illegitimate
- The separation of branches and the creation of the several states and the federal government have been torn down
- Our borders have been torn down by illegitimate global forces
- The supreme laws of the land have been ridiculed and watered down
- God's law and the natural principal laws have been "lost"
- Individual sovereignty and free will and the God given untouchable nature of private property has been over run.
- The war upon our birth rights is near victorious because of people like you
- The current laws of the land are progressive, relative, changing, ungrounded and unprincipled
- Once you breech individual rights, unalienable rights, natural rights, private property rights rights
 - You have no rights at all
 - You can easily steal for A and give it to B
 - For any reason and cause
 - Any legislation, administration, judication can quickly be passed to take from A and give to B
 - Nothing under the sun, is sacred
 - when you discount the sacred boundaries of the home, land, lives, personal property.
- County zoning, building codes, land and home restrictions are all unconstitutional
 - These codes, regulations, statutes, etc. are not enforceable against natural born free sovereign state Citizens
 - They are only enforceable against the applicable government employees and those who who live within their jurisdiction
 - The irony is, that all of the King's horses and King's men have merely imprison

themselves with their straggling maize of oppression

- **Natural born free sovereign state Citizens owe nothing to no one,**
 - **did you know that Senator?**

 - **We owe no taxes, no land takings, no home takings, no water takings on our private property,**
 - **did you know that Senator?**
-

The charade of taking by force from A and giving to B is over

- **Your very birth into this world by God gave you a set of divine birth rights**
 - **Even before there was a constitution,**
 - **before laws of any kind,**
 - **before the Bible,**
 - **you and I had these certain sacred bundle of birth rights,**
 - **did you know that Senator?**

- **But for some strange reason, we all developed amnesia over the last 232 years and gave them up**
- **Even more stranger than fiction, we have allowed tyranny to rule over divinity**
- **We forgot our own God given sacred unalienable birth rights**
- **We have allowed fools like you to rule over us thinking that is the way it is suppose to be**

This is the beginning of the end for the Taking Era

- **The game is over**
- **The debauchery is being systemically exposed**
- **You are perfectly capable of discovering all these truths**
- **but you prefer to live in your self limiting box of narrow minded green and socialistic ideologies**
- **You and all of the politicians like you..**

- ARE A DISGRACE TO THE FOUNDING SELF EVIDENT TRUTHS THAT WE ARE CREATED FREE
- AMERICAN'S AND AMERICA WAS CREATED TO BE COMPLETELY FREE
- THESE TRUTHS ARE SELF EVIDENT IT SEEMS TO ONLY THOSE AWAKENING A CROSS AMERICA
- MANIPULATORS AND PLANNERS WHO THINK THEY CAN CULL OUT THE SPIRIT OF FREE CHOICE
 - INTO PREPACKAGED BOXES OF COMMUNITIES, RIDING BICYCLES DOWN PAVED PATHS
 - WILL NOT HAVE THEIR JOBS OR THEIR ARROGANCE TO STAND ON LONG

All government and especially the big two political parties must be thrown out. Until then we must go around them quickly as they have done to us. It is takings as usual until each one of us jerk up every government employee who is stalking our private property as well as our public property. Government from small cities like my own Enumclaw, Washington to the federal government are on a feeding frenzy of anything they can take to make themselves fatter.

We desperately need more leaders like, U.S. Representative Ron Paul, M.D. He has been the only one willing to stand up and publicly expose what the hell is going on in America and how American is being manipulated by global and foreign powers for their own profit gain. He has been the lone sentinel, one of some 535 speaking out exposing the debauchery and tyranny of the the last 232 years.

How long will it take for more enlighten leaders to stand up beside Dr. Paul and pull the sword of sword of individual freedom from the rock of collectivism and tyranny?

"But when a long train of abuses and usurpations, pursuing invariably the same object evinces a design to reduce them under absolute despotism, it is their right, it is their duty, to throw off such government, and to provide new guards for their future security. --Such has been the patient sufferance of these colonies; and such is now the necessity which constrains them to alter their former systems of government. The history of the present King of Great Britain is a history of repeated injuries and usurpations, all having in direct object the establishment of an absolute tyranny over these states. To prove this, let facts be submitted to a candid world."

Subject: From the Office of Senator Cantwell

Dear Mr. Venrick,

Thank you for contacting me with your concerns about climate change. I appreciate hearing from you on what I believe is the preeminent environmental challenge facing our generation and sincerely regret the delayed response.

As you know, scientists have conclusively determined that an ongoing buildup of greenhouse gas emissions, including carbon dioxide, methane, and nitrous oxide, is causing the Earth's climate to warm and could lead to drought, flooding, and other catastrophic natural disasters. In Washington, climate change is expected to alter the region's historic water cycle, threatening drinking water supplies, wildlife and salmon habitat, and the availability of emissions free hydropower. In fact, researchers have found that temperatures in the Puget Sound region will rise about 2 degrees by 2050 and cascade mountain temperatures could rise 10 degrees or more by 2090. Considering these potentially serious environmental and economic consequences, I believe that the United States must urgently address this matter, in partnership with the rest of the world.

On December 19, 2007, the greenest, most important energy bill in our nation's history was signed into law. I am proud to have helped craft the Energy Independence and Security Act of 2007 (H.R. 6), which will help create cleaner, more diverse sources of energy supply, build new growth industries that support high wage "green-collar" jobs, give consumers and businesses more affordable energy choices, and protect our environment. This landmark energy legislation aggressively boosts energy efficiency efforts by making our lighting and appliances more efficient and reducing the federal government's energy use. In addition, a provision I authored was included which will make our electricity grid smarter and more efficient.

Under the new law, fuel economy standards will increase for the first time in over two decades to a nationwide average of 35 miles per gallon (mpg), up from 25 mpg today, by 2020 for all vehicles including SUVs and light trucks. By 2030, these measures will displace the equivalent of one-third of our foreign oil needs, save American consumers at least half a trillion dollars in energy costs, and reduce our nation's carbon dioxide emissions by the same amount as all of our vehicles on the road produce today.

In addition to raising Corporate Average Fuel Economy (CAFE) standards, the new energy law includes mandates and incentives for biofuels to become a greater part of our nation's total energy consumption. The bill increases the renewable fuels standard to

36 billion gallons by 2022, of which at least 21 billion gallons must come from non-food feedstocks like agriculture and wood waste. Increased energy production from domestic renewable resources will not only benefit the environment, but also provide for new jobs in the farming and forestry industries. Together, these efforts will help reduce the amount of harmful emissions - including those that contribute to global warming - while reducing our reliance on fossil fuels. I am also pleased that the Energy Independence and Security Act contained my legislation banning manipulation in the oil and gasoline markets.

While I was pleased with the passage of this landmark energy legislation, there was a key provision I fought for - a tax package extending and expanding incentives for alternative energy technologies - that was removed in the face of a presidential veto and filibuster by the Senate minority. Refusing to let an opportunity to preserve and create over 100,000 green collar jobs and ensure over \$20 billion in domestic clean energy investments pass by, I recently led a successful effort to pass legislation in the Senate that, if enacted, would extend clean energy tax incentives scheduled to expire at the end of 2008. On April 10, 2008, the bipartisan Clean Energy Tax Stimulus Act (S. 2821), which I introduced with John Ensign (R-NV) just a week earlier, was included as an amendment to the Foreclosure Prevention Act of 2008 (H.R. 3221) that passed the Senate later that day by a vote of 88 to 8. This legislation, cosponsored by 43 of my Senate colleagues, would provide the continuation of clean energy production incentives for wind, solar, and other renewable sources, and incentives to improve energy efficiency that will create hundreds of thousands of jobs, save people and businesses money, and reduce energy costs over time.

While these energy measures provide critical tools necessary to reduce our greenhouse gas emissions, we also need federal legislation that establishes scientifically based emissions caps. Unfortunately, I have concerns about the cap-and-trade greenhouse gas reduction program legislation introduced so far in the Senate, including the Lieberman-Warner Climate Security Act (S. 3038), because they unfairly penalize the Pacific Northwest's decades-old reliance on emissions free hydropower. In addition, S. 3038 does not recognize that our state's hydropower system is mature and won't be able to add much more capacity in coming years, thus any future electricity generation will be relatively more polluting. Some legislative proposals would also effectively penalize Washington state for its years of aggressive energy efficiency measures, making any additional savings more costly for Washington state relative to other parts of the country. Finally, I have strong concerns that some cap-and-trade proposals could provide windfalls to historic greenhouse gas emitters, or allow excessive speculation and manipulation of emission allocation trading markets. For decades, Washingtonians have been on the cutting edge of clean energy solutions and energy efficiency, setting an example for the rest of the nation. I will continue working with my colleagues to craft legislation that will cut our greenhouse gas emissions without punishing low carbon intensity states.

You may also be interested to learn that, on November 14, 2007, I introduced the Climate Change Adaptation Act of 2007 (S. 2355). This comprehensive legislation recognizes that the impacts of climate change are already occurring and will continue in the coming decades even if we begin dramatically decreasing our greenhouse gas emissions today. If enacted, my bill will require the President to develop a national strategy for addressing the impact climate change will have on our natural resources. It will also specifically require the National Oceanic and Atmospheric Administration (NOAA) to conduct vulnerability assessments on the impacts of climate change on coastal and ocean resources, and prepare an adaptation plan for such resources. The Climate Change Adaptation Act was unanimously approved by the Senate Commerce Committee on December 4, 2007, and is awaiting consideration by the full Senate.

On May 27, 2008, I chaired an official Subcommittee on Oceans, Atmosphere, Fisheries and the Coast Guard hearing on the Effects of Climate Change on Marine and Coastal Ecosystems in Washington state. During the hearing, I received testimony from national and regional experts on the effects of climate change on the health of Puget Sound and oceans, and the impact rising sea levels could have on Washington state communities. Washington is projected to sustain sea level rises up to two feet by 2040, which would put 56 square miles of the state underwater and affect at least 44,429 residents - more than the current population of Olympia. Also, almost half of our carbon dioxide emissions end up in our oceans, over half a trillion tons since the start of the Industrial Revolution, which is making the water more acidic. Ocean acidification is detrimental to many ocean organisms, including coral, and threatens to disrupt ocean habitats and coastal economies around the world, including Washington state's trademark \$3.5 billion fishing industry. When we combine the impact of ocean acidification with the additional climate change effects of increasing ocean temperatures, changing winds and currents, and rising sea levels, the impacts our carbon emissions have on marine environments like the Puget Sound are too devastating to ignore.

Like you, I am encouraged by growing momentum for developing solutions to climate change. As a member of both the Senate Energy and Commerce Committees, I plan to continue learning more about the science of global warming and pushing the most effective policies and regulations that could be implemented to help limit greenhouse gas emissions. Please be assured that I will work with my colleagues to ensure that we seize this opportunity to move towards creating a cleaner, more diverse and secure 21st Century energy system.

Thank you again for contacting me to share your thoughts on this matter. Finally, you may be interested in signing up for my weekly update for Washington state residents. Every Monday, I provide a brief outline about my work in the Senate and issues of importance to Washington State. If you are interested in subscribing to this update, please visit my website at <http://cantwell.senate.gov>. Please do not hesitate to contact me in the future if I can be of further assistance.

Sincerely,
Maria Cantwell
United States Senator
