Subject: Fort Discovery - New Videos Uploaded!

Dear family, friends, citizens and business associates:

How Many Cases in Jefferson County Have Been Affected by Hidden Records...

Why do we as taxpayers want to reward Jefferson County with a sales tax increase when some of our elected officials are acting outside the law?

Is Jefferson County's Conspiracy Against SSNW Starting to Unravel...

First, it was about noise...but Jefferson County didn't have a noise ordinance. Then it was about building permits...but Jefferson County never wrote a single report or conducted a single investigation (only press releases). Then there were ex-parte communications between the Prosecutors office and the Hearing Examiner (Irv Berteig)...now SSNW has discovered violations of the open public records law, which has effected all of our previous hearings and matters before the courts. Will this cost all the taxpayers in Jefferson County and consequently force matters to be reheard and or have new rounds of discovery at the county's expense? Stay tuned.
