

September 30, 2021

Mr. & Mrs. John R. Venrick
20561 Wild Horse Ranch Rd.
Rollins, MT 59931-9800

Dear Mr. and Mrs. Venrick,

A few weeks from now, on November 1, the global climate panic movement will convene in Glasgow, Scotland.

This is the site of “**COP26**” – the United Nations’ 26th annual Climate Change Conference.

Delegates from 196 nations to this year’s conference believe they have much to celebrate:

- President Joe Biden, on his first day in office, ordered that America re-enter the job- and economy-killing Paris Climate Accord.
- The COVID-19 lockdowns, so despised by most Americans, are now being hailed as a “dress rehearsal” and mass conditioning for Americans to prepare them for the energy-starved, freedom-diminished society the climate change warriors deem essential to “save the planet.”
- Joe Biden has cancelled the Keystone XL pipeline and banned much oil and gas drilling in the U.S. – effectively ending the beneficial energy independence our nation achieved under President Trump. And is now begging OPEC to supply the oil and gas he deprived us of!
- Biden’s so-called **\$1.5 trillion** “infrastructure plan” now before Congress is a thinly disguised effort to enact major portions of the radical Green New Deal hatched by socialists Bernie Sanders and Alexandria Ocasio-Cortez.
- The mainstream media – working in tandem with its allies at Facebook, Twitter, Google, etc. – have never been more willing to terrorize the public by publishing every Domsday prediction issued by the climate panic crowd. Even worse, they are refusing to report – and actually **censoring** – any information that challenges the climate alarm narrative.

But, perhaps most importantly, COP26 attendees are gearing up to celebrate the latest end-of-the-world, climate panic porn that is the UN’s latest climate change report.

The **AR6 Climate Change 2021 Report**, recently released by the UN's Intergovernmental Panel on Climate Change (IPCC), has declared a "code red for humanity" that "must sound a death knell for ... fossil fuels, before they destroy our planet."

What could go wrong for the intoxicated-by-their-own-success climate alarmists about to descend *en masse* on Glasgow?

What could go wrong with their plans to again use this conference to dupe the world's media into unquestionably reporting every fear-mongering, climate change "tipping point" prediction?

And with their assertion that "saving humanity" means giving up prosperity, accepting a much lower standard of living, and embracing socialism?

Answer? We could. And *we will*, with your help.

Mr. and Mrs. Venrick, your generous donation today will help make sure CFACT will be in Glasgow, too – as a fly in their ointment!

Your generous donation dollars have helped make CFACT the leading voice for climate reason and an aggressive antidote to climate hysteria. *No one is doing what we do*, and that is thanks to you and others like you.

That's why I hope I can count on your help once again so that we can send our crack CFACT team directly into the belly of the beast in Glasgow a few weeks from now.

We will be there to expose the fear-mongering and junk science, just as we do at countless demonstrations and climate alarm events across the world.

This is what we do best, and no other group does it better!

You should know the latest UN's IPCC report – perhaps you have already seen media coverage of it – is designed to have more impact on climate alarm action around the world than any previous report.

This report is almost 4,000 pages long instead of their usual 1,000. It was compiled by hundreds of government-approved scientists over the past four years.

Predictably, extreme Green politicians and media pundits have adopted an almost religious reverence toward the report.

Typical of responses is that of UK chief scientific adviser Patrick Vallance, who tells the *Guardian*, "The IPCC report is clear: Nothing short of transforming society will avert catastrophe."

Make no mistake. "Transforming society" is the ultimate goal of this report and the movement behind it.

The latest UN IPCC report claims that we can't stop global warming from

intensifying over the next 20 years. Average surface temperatures will continue to rise over this period.

The inevitable result will be “life-threatening heatwaves, severe droughts, inland and coastal flooding, melting glaciers, decreased mountain snowfall, the extinction of many plant and animal species, as well as massive die-offs of many of the coral reef systems that sustain fisheries.”

You may have seen my friend and CFACT colleague Marc Morano, publisher of CFACT’s **Climate Depot** website, recently on *Fox and Friends*. He informed viewers that the IPCC is a “political lobbying arm” that “pretends to be a science panel.”

Exactly right!

But as usual, the world’s media has played along with the hype in this report. You’ve probably seen some of the headlines:

- “Climate change has reached an unprecedented level, with little time to act, a stark new UN report finds” – *Boston Globe*
- “UN Report Terrifies the World” – *Wall Street Journal*
- “The new UN climate change report shows there’s no time for denial or delay” – *Science News*
- “UN Climate Change Report Sounds ‘Code Red’ for Humanity” – *Reuters*
- “UN Glasgow summit may be our last chance to prevent self-created climate disaster” – *The Hill*

The New York Times summarized the scaremonger tactic the mainstream media is taking: “It is unequivocal that human influence has warmed the atmosphere, ocean, and land.” Many of the changes inflicted on the planet – especially our oceans – will be “irreversible for centuries to millennia,” and continued warming will lead to an acceleration of “extreme events unprecedented in the observational record,” it warns.

But just how accurate is this UN report? I will get to that below.

First, you should be aware this report makes this particular UN conference extremely dangerous.

The climate panic crowd seen to gather in Glasgow smell victory! Because they believe they can use this Doomsday **AR6 Climate Change 2021 Report** to demand the radical “climate solutions” they want – *with immediate effect!* – including:

- Replacing all carbon-based fuel with wind and solar power. “*I want COP26 to be the COP where we consign coal power to history,*” Alok Sharma, UK president for COP26, told journalists in an interview with *Reuters*.

- All nations will be pressured to commit to being “carbon neutral” by 2050. Even though every reputable study proves there is no conceivable way “renewable” sources can meet the world’s energy needs.
- Switching to electric vehicles. Forcing people into public transportation.
- Massive transfers of U.S. wealth to developing nations through the “Global Climate Fund.” You won’t be surprised to hear that ahead of COP26, more than 100 developing countries have set out their demands, including: funding to fight and adapt to climate change, compensation for the effects it will have on them, and money to help make their economies “greener.”

Under the panic agenda likely to be demanded at **COP26**, the U.S. would need to reduce emissions by 195 percent below 2005 levels by 2030. This could be made up of a 70 percent cut in domestic emissions plus \$80 billion a year in support for developing countries.

And these drastic “climate change cures” are only the beginning!

A climate alarmist team at the University of Leeds recommends:

*“In order to save the planet from catastrophic climate change, Americans will have to cut their energy use by **more than 90 percent** and families’ homes should limit to housing no larger than 640 square feet ...*

“... public transportation should account for most travel. Travel should, in any case, be limited to between 3,000 to 10,000 miles per person annually.”

Even extreme measures like removing red meat from our diets and doing away with air conditioning will be on the table if the climate alarmists get the momentum they expect for the Glasgow conference.

Goals like these seem impossible, of course. And they may be ... for now.

But *even trying to reach them* will destroy American prosperity and reduce middle class America to levels of poverty not seen since the Great Depression.

In ordinary times, no American political leader would pledge the country to such a suicidal course. *But these are not ordinary times.*

As you know, at this moment much of our national leadership – in the White House and in Congress – is in the thrall of a deranged cult of extremists.

Extremists using climate-based fear-mongering to achieve their idea of a government-controlled society – based on socialism, of course – where “consumerism” is

abolished, energy independence is a forgotten dream, our freedoms are severely diminished, and poverty becomes the norm.

Yes, thanks to dishonest UN climate hype, thanks to the momentum for drastic action they hope this report will achieve at the Glasgow conference, these dangerous and unworkable ideas are really on the table.

Nothing is too far out to be embraced by today's crazed climate warriors!

But here's the reality: The end-of-world "code red" report issued by the UN, along with the breakthrough reporting delegates will be feasting on a few weeks from now in Glasgow, is full of hype, shaky science, and outright misinformation.

Sponsor 2
The alarmism in the UN's AR6 report is not new. Green extremists have been making spectacular predictions of gloom and doom for decades.

Remember when Al Gore told us the Arctic Ocean would be ice free by 2014? Wrong!

How about when Prince Charles told us in 2009 that we only had 100 months left to save the world. Of course, time on this dire prediction ran out and he had to move the deadline many decades into the future.

And how about this embarrassing whopper:

In its 2007 climate assessment, the IPCC claimed "Glaciers in the Himalaya are receding faster than in any other part of the world. The likelihood of them disappearing by the year 2035 and perhaps sooner is very high if the Earth keeps warming at the current rate."

Three years after the IPCC made this dire Himalayas claim, it was forced to admit the claim was completely unfounded.

It did not come from peer-reviewed research but from a media interview with a climate "expert" in 1999.

You won't be surprised to hear there are several key findings this most recent report also gets wrong ...

To begin with, this is another IPCC report based largely on computer climate models. What the report doesn't say, what you won't hear in most of the media, is just how spectacularly wrong these models have proven to be.

Enough time has gone by since the earliest models to test their predictions against real world results. The fact is most of the 100 or so models the climate alarmists cling to overstate warming of the world's climate.

Yet these models still provide the basis for breathless claims of doom made by the UN IPCC.

Barack Obama's own science advisor, **Steven E. Koonin**, says:

“The latest models also don't reproduce the global climate of the past. The models fail to explain why rapid global warming occurred from 1910 to 1940, when human influences on the climate were less significant.”

Dr. Koonin also points out concerning this latest report:

“The Summary for Policy Makers section says the rate of global sea-level rise has been increasing over the past 50 years. It doesn't mention that it was increasing almost as rapidly 90 years ago before decreasing strongly for 40 years.”

And Physicist **Dr. Ralph Alexander** says concerning AR6:

“In making wrong claims about the present climate and relying too heavily on high-emissions scenarios for future projections, the [UN's] IPCC has strayed from the path of science.”

Dr. Alexander explains:

“There's no scientific evidence that global warming triggers extreme weather, or even that weather extremes are becoming more frequent. Anomalous weather events, such as heat waves, hurricanes, floods, droughts and tornadoes, show no long-term trend over more than a century of reliable data.”

Extreme weather expert **Dr. Roger Pielke Jr.** of the University of Colorado concurs. He says this UN IPCC report “*is heavily biased to extreme scenarios.*”

What are the facts about extreme weather?

Deaths connected to extreme temperatures have actually been *declining* since 2000.

Both Environmental Protection Agency and National Hurricane Center data “show hurricanes have neither become more numerous or more powerful during the past half-century.”

Meanwhile, real data and scientific facts undermine this UN report's end-of-the-world claims. Conveniently left out of this report are the potentially *beneficial* aspects of warming:

- A NASA study found that, for over 35 years, rising CO₂ levels have added an area of green vegetation to the planet equivalent to twice the size of the continental United States.
- A recent study in the medical journal *Lancet* finds about half a million people die from heat per year, but 4.5 million people die from cold. As the climate slightly warms, it actually saves 166,000 lives each year.

- The UN AR6 Report also fails to acknowledge that the introduction of oil just over 100 years ago has been overwhelmingly beneficial for the prosperity of the world's population. The UN IPCC goal to banish fossil fuels will rob most of the world's population of life-saving medical care, energy to heat their homes, and famine-proof agriculture. It would throw the world back into medieval times.

By almost exclusively focusing on negative side-effects, the IPCC report totally denies the fact that fossil fuels are making the world better and better – saving lives, feeding billions, and raising up the overall standard of living for humanity.

This latest UN climate report is just the latest in a series designed to use the effects of climate change to coerce political action.

Even Al Gore has publicly admitted the UN reports are “*torqued up*” to promote political action – “*How [else] do they get the attention of policy-makers around the world?*”

It's no surprise, then, that **UN Secretary-General António Guterres** is a former president of Socialist International.

He's spent his career touting that climate tipping points and “irreversible” changes would occur unless we are obedient to the climate alarmist demands. His message? *Quick! Pay up and obey, or the UN to take over your life or the climate will get you and everyone will die.*

Will we allow the dishonest conclusions in this UN report to go unchallenged in Glasgow? And be used to promote radical and destructive policies here and around the world?

No, we will not!

Not if supporters like you make CFACT's presence at this conference possible.

Thanks to the support of donors like you, CFACT has been able to attend virtually every climate conference held by the UN, going all the way back to the original infamous Kyoto conference in 1997.

We have exposed the anti-capitalist, anti-freedom agenda preached at these meetings. And we have brought scientific facts straight into the belly of the beast like no other group in the world.

I write to ask you to help us fight the good fight once again against globalist forces that would erase American liberty and instill socialism through bogus climate policies.

Specifically, we urgently need you to do two things:

First, share the information contained in this letter with your family, friends, and neighbors.

We need to get the word out far and wide of the danger that confronts our nation. You might even consider writing a letter to the editor in your local newspaper or posting something informational about it to heighten the issue on your social media page.

Second – and most importantly – we ask that you help us send a crack CFACT team of activists to Glasgow to challenge UN climate hysteria right in the lion’s den.

With your most generous financial help, CFACT will be able to shine the light of truth and expose the plans of the UN and the radical Greens as they attempt to work to frighten and deceive the American people.

Yes, we have a plan.

A plan for maximum impact and maximum media attention. But we need to move quickly as this conference is only a few weeks away!

Our planned activities in Glasgow include:

- As always, CFACT will disseminate **climate facts** and **challenge the climate panic hype** with the truth anywhere and everywhere possible at the conference.
- As a recognized non-governmental organization (NGO) with access to UN panel discussions, CFACT will actively **engage** delegates, reporters, celebrities, and prominent attendees from around the globe about the critical need to stop alarmist efforts to dismantle important sources of energy which are needed to power the world’s economy and deliver millions from poverty. *With as many of these exchanges captured by global media as possible!*
- CFACT will again hold **press briefings** during the conference, featuring real science from respected scientists around the world who reject climate Doomsdayism.
- We will participate in dozens of **television and radio interviews** reporting about significant facts that are not being covered by the climate-alarm-friendly media.
- We will distribute a well-sourced and documented rebuttal debunking the **IPCC AR6 Doomsday report** to all delegates and media we meet at the conference.
- CFACT’s **Marc Morano**, perhaps the best debater in the climate realism community, will openly and vocally challenge any climate alarm spokesperson in a **public debate**. From Greta Thunberg to Biden “climate czar” John Kerry and anyone else willing to go in front of the world’s media and pit hype and exaggeration against science and reason.

- CFACT will distribute copies of our **blockbuster movie, *Climate Hustle 2: Rise of the Monarchy***, to all delegates and media we meet covering the conference.

You may recall our first documentary film, *Climate Hustle*, generated massive media coverage at the Paris conference several years ago. As usual, we expect our latest movie to trigger a robust protest by Green activists. Which in turn will provide our side with another opportunity for media exposure!

- And finally, CFACT will seek to perform one of our patented media events – which the world press never fails to cover! Such as parachuting over the conference as we did in Durban, a friendly “raid” on Greenpeace’s *Rainbow Warrior* as we did in Copenhagen, or dramatically shredding the Paris Climate Agreement as we did in Morocco. All designed to bring attention to the lack of real science behind the claims of the climate extremists!

To send this top-notch delegation to Glasgow – and to launch an effective, massive public education campaign to debunk the phony science of the climate alarmists – we estimate we will need at least \$285,000.

Our attendance at these gatherings always makes an impact – as even climate alarmists begrudgingly admit!

Almost every year since our founding, CFACT has sent an enthusiastic team of experts – experts who challenge climate alarm dogma – to nearly every major UN climate conference.

We attend these conferences because we know these climate alarm pep rallies aren’t just distant noise and thunder. They are actually dangerous to America and our freedom.

And when we go, we make ourselves and your voice heard!

With your continued vital support today, we will remind the world the real agenda of the UN climate-crats is not about “science” or “saving the planet,” but about ideology and power.

Its main goal is moving America toward the kind of socialist model the UN and the climate alarmists prefer.

They would rather be petty gods in a society where all men are chained to tyranny rather than to be equals in a society where all men are free.

I promise you, we will get abundant media coverage – and, as usual, we will make the organizers of these conferences uncomfortable. Their “science” is not settled. And we’re the ones to expose them!

Mr. and Mrs. Venrick, we have just a few weeks to raise the funds we need to fully fund our efforts to confront and debunk the climate alarmists at COP26 in

With all these vital plans already underway, you can see why we must raise the full \$285,000 budget *now* before the conference convenes on November 1.

Your tax-deductible donation of **\$25, \$50, \$100, or more** is urgently needed to help pay for CFACT's "truth delegation" and expenses at this upcoming climate summit.

With thanks,

Craig Rucker
President and Co-Founder

P.S. No one is more prepared or more experienced in confronting climate alarmism than CFACT. Help us now to make the most of this upcoming UN climate conference in Glasgow to tell the world the truth about our climate panic.

Help us tell them that climate Doomsday is not around the corner and that climate-driven socialism is the real Doomsday scenario for our future.

We must not let the extremists go unchallenged, nor allow the climate alarmists to claim they are unopposed in their extreme agenda. With your help today, CFACT will send a top-notch team to the UN climate summit in Glasgow. We will use your donation dollars to debunk the latest UN climate report and expose the lies and tell the truth to a worldwide audience.

Mr. and Mrs. Venrick, as one of our most valued supporters, you know no one else is doing the work CFACT does. No one else is such a thorn in the side of the climate extremists. No one else does more to "take the fight to the enemy" than CFACT. Your gift of **\$25, \$50, \$100, or more** is urgently needed today!
