

October 13, 2023

Dear Mr. & Mrs. Venrick,

A few weeks from now, on November 30, the global climate hysteria industry will convene in Dubai, United Arab Emirates.

This is the site of “**COP28**” – the United Nations’ 28th annual Climate Change Conference. This is the annual gathering of the “high church” of the global cult of climate doom. More than 70,000 participants are expected at the conference.

You might think this gathering of climate change fanatics (and the politicians and hucksters who make enormous profits from their climate panic agenda) is the last place you would expect to hear about the growing number of scientists pushing back on the idea that we’re in a “climate crisis.”

If so, you would be wrong.

You would be wrong because *CFACT will be there*.

We will be there reminding attendees and the global media covering the conference of undeniable facts.

Facts, such as the fact that the climate doomers’ endlessly repeated claim that “97 percent of scientists” agree with them is FALSE.

It’s not true. Never was true. And we have recently seen dramatic levels of pushback from scientists who say that they emphatically DO NOT AGREE with the idea that the human race faces extinction from climate change.

In fact, did you know that more than 1,600 scientists – including two Nobel laureates – recently signed a declaration saying, “**There is No Climate Emergency**”?

I think the delegates to COP28 and the media covering the conference ought to hear about this. And they will – *with your help*.

Mr. & Mrs. Venrick, your generous donation today will help send CFACT to Dubai for COP28. Speaking truth where no one else dares to!

Your generous donation dollars in the past have helped make CFACT the leading voice for climate reason in the world today, and an aggressive antidote to climate hysteria. *No one is doing what we do*, and that is all thanks to you and others like you.

That's why I hope I can count on your help once again so we can send our crack CFACT team directly into the belly of the beast in Dubai a few weeks from now.

CFACT is a recognized NGO (“non-governmental organization”) observer to the United Nations. While at the conference, we will – as usual – infiltrate as many meetings and panels as possible, distributing climate realist material to delegates, asking pointed questions of panelists, and exposing the inner goings-on right in the heart of the UN climate movement.

Believe me, nothing will be higher on our agenda than helping shred the myth of “climate change consensus” in the scientific community.

This information will literally rock the world of delegates, as they will hear – many for the first time – that serious scientists disagree with them. And with solid reasons to do so.

Climate scientist Judith Curry recently said that the climate science consensus is a “manufactured consensus.” She says scientists are pressured to support the climate panic position in pursuit of “fame and fortune” – just as *she* was once upon a time! Curry says that when she parroted the party line on climate change she was treated like a “rock star.”

But Curry came to realize that there is a “climate-change industry” set up to *reward* alarmism.

She also says one of the favorite tactics of the climate deceivers is to tie extreme weather events like hurricanes to climate change. We've seen so much of this lately! But this idea is not based on actual science.

You and I have known this for years, but here is a leading climate scientist spilling the beans on the myth of consensus.

Judith Curry is one of the 1,600 scientists who have signed the declaration rejecting climate catastrophe. That declaration says this:

“Climate advocacy has devolved into mass hysteria ... Global warming has not increased natural disasters. There is no statistical evidence that global warming is intensifying hurricanes, floods, droughts and suchlike natural disasters, or making them more frequent. However, there is ample evidence that CO₂ mitigation measures are as damaging as they are costly.”

Of course, this scientific statement will be shocking news when we share it in Dubai a few weeks from now. And it's a message I and the dedicated CFACT team that will accompany me are excited to deliver.

Because, even as the so-called “consensus” on climate disaster continues to unravel, this UN climate meeting is shaping up to be an international doubling-down on the ever-more-radical Green agenda.

And that means we can expect more energy rationing, more blackouts, and more economic disruption as impractical energy policy “solutions” are enacted here in America and around the world.

A leading voice at the conference will be the far-left World Economic Forum. This Soros-funded organization will be pushing their “Building Momentum” plan to accelerate the Green transition.

The climate radical group **Nature Conservancy** will also be there. In their own words, at COP28 they will be advocating for “*fast-tracking our global transition to clean energy and decarbonize the energy industry*” ... and ... “*helping the most vulnerable communities adapt to and recover from the effects of climate change that they’re already experiencing.*”

In the lead-up to COP28, the UN has been pushing for a “global carbon tax on fossil fuels.” The UN is also pushing more development restrictions on Africa and other poor regions.

The UN chief wants Africa to avoid fossil fuels and embrace solar and wind power instead. The question needs to be asked: Why does the UN want Africans to NOT have wealth and prosperity like Western nations?

The UN COP28 website breathlessly claims, “*We need to reduce emissions by 43% by 2030 and course correct on adaptation, finance, and loss and damage. We are at a halfway point. It has been 7 years since Paris, with 7 years to go to 2030.*”

If you think that’s scary, you’re right. Reducing emissions by 43% in seven years is not just impossible. Attempting to do so will also be catastrophic in terms of our standard of living, our entire economy, and our national security.

And how about this ...

Marc Morano, editor of CFACT’s Climate Depot news and information service, is reporting the growing acceptance of global totalitarianism in the climate change movement.

Marc has detailed alarmist discussions of using recent advances in AI technology to create a global “Climate Trace” system to monitor 72,000 alleged CO₂ emitters. As well as their idea of creating a Chinese-style social credit system to shame companies and anyone deemed responsible for such emissions.

This is the kind of thinking we will confront at COP28.

Because, at COP28, the climate fanatics will be fomenting their climate fear

mongering in order to achieve a worldwide government-controlled society – based on socialism, of course ...

... where “consumerism” is abolished, energy independence is a forgotten dream, our freedoms are severely diminished, and poverty becomes the norm.

The UN and leftist elites hate the individual freedoms we all take for granted.

Driving and owning your own car, having a house and a yard, eating red meat, traveling via car or plane, and having a large family are all things that must be stopped in their view.

Why?

Because they say these things are supposedly killing the planet. In reality, that’s just a ruse to scare people into supporting a global socialist agenda. Really, they want control over every aspect of your life.

Will we allow this dangerous climate doom agenda to go unchallenged in Dubai? And be used to promote radical and destructive policies here and around the world?

No, we will not!

Not if supporters like you help make CFACT’s presence at this conference possible.

As I mentioned before, CFACT has a plan to expose this Great Reset agenda and bring the facts directly to the UN’s big, anticipated meeting. With your help:

- CFACT will distribute copies of the recent blockbuster declaration of 1,600 scientists rejecting the so-called climate doom consensus to attendees and delegates to inform as many people as possible.
- Funding permitting, we will sponsor a conference panel to be covered live outside the COP28 facility. Our goal is to debunk the climate propaganda claims *as they emerge* in the conference.
- **Marc Morano**, editor of CFACT’s Climate Depot, will again perform television and radio interviews live from the conference to expose the discussions of what is going on inside the panels and meetings by UN officials.
- Copies of our *Climate Hustle 2* documentary, which has recently aired twice in primetime on national television via Newsmax, will also be passed out to delegates and conference attendees. When we distributed copies of our film at the last UN COP conference, many attendees told us they had never heard the realist message explained to them before.

- In cooperation with the growing number of climate skeptical allies in the European Union, we will help organize a conference attacking the EU's catastrophic "Green" policies on energy and food. Policies that are causing shortages and blackouts across Europe and the rest of the world.
- As usual, our CFACT conference team will conduct one of our irresistible-to-the-media escapades. These are designed to poke fun at the UN's ridiculous climate claims and blatant hypocrisy on energy, climate, and food issues.

Past episodes included dressing up in traditional Scottish attire to find the Loch Ness Monster in Scotland, shredding a copy of the Paris Climate Agreement at the UN conference in Morocco, and dropping a banner off of a docked Greenpeace's ship in Denmark, declaring it to be a "Ship of Lies."

With these activities and others, I assure you we will be there in Dubai to expose the Green Left's fear mongering and junk science, just as we have at countless other demonstrations and climate alarm events across the world.

This is what we do best, and no other group does it better!

Our voice of sanity and realism will be a shock to the attendees of this year's climate conference who believe they have much to celebrate.

COP28 will convene a few weeks from now on November 30.

Thanks to the support of donors like you, CFACT has been able to attend virtually every climate conference held by the UN, going all the way back to the original infamous Kyoto conference in 1997.

Mr. & Mrs. Venrick, I write today to ask you to help us fight the good fight once again against globalist forces that would erase American liberty and instill socialism through bogus climate policies.

I ask that you help us to once again send a crack CFACT team of activists to enter the lion's den to challenge UN climate hysteria.

And help us to make sure no one can honestly report that there were not dissenting voices in the global climate Left's plan to take away our freedom and our prosperity.

To send this top-notch delegation to COP28 – and to launch an effective, massive public education campaign to debunk the phony science of the climate alarmists – we estimate we will need at least \$293,000.

Our attendance at these gatherings always makes an impact – as even climate alarmists begrudgingly admit!

Mr. & Mrs. Venrick, with your continued vital support today, we will remind the world that the real agenda of the UN climate-crats is not about “science” or “saving the planet,” but about ideology and power.

Its main goal is a literal remaking of humanity, including moving America toward the kind of socialist model the UN and the climate alarmists prefer. They would rather be petty gods in a society where all men are chained to tyranny than be equals in a society where all men are free.

I promise you, we will get abundant media coverage – and, as usual, we will make the organizers of these conferences uncomfortable. Their “science” is not settled. And we’re the ones to expose them.

We have just a few weeks to raise the funds we need to fully fund our efforts to confront and debunk the climate alarmists at COP28 in Dubai in the United Arab Emirates. With all these vital plans already underway, you can see why we must raise the full \$293,000 budget *now* before the conference convenes on November 30.

Mr. & Mrs. Venrick, your tax-deductible donation of \$25, \$50, \$100, or more is urgently needed to help pay for CFACT’s “truth delegation” and expenses at this upcoming climate summit and all our other vital work.

No one is more prepared or more experienced in confronting climate alarmism than CFACT. Help us now to make the most of this upcoming UN climate conference in Dubai to tell the world the truth.

Please help us tell them that a climate doomsday is not around the corner and that climate-driven socialism is the real doomsday scenario for our future.

With thanks,

Craig Rucker
President and Co-Founder

P.S. Mr. & Mrs. Venrick, there are so many ways you can help us to challenge Green extremism and their toxic agenda. As you are inspired, please write your congressman, write letters to the editor of your local paper, and share CFACT’s materials over social media to help debunk and expose Green lies.

As one of our most valued supporters, you know no one else is doing the work CFACT does. No one else is such a thorn in the side of the climate extremists. No one else does more to “take the fight to the enemy” than CFACT. **Your gift of \$25, \$50, \$100, or more is urgently needed today!**

Climate Alarmists to Meet in Dubai to Take Away Your Freedom and Prosperity ...

HELP CFACT SPREAD THE TRUTH!

To: Mr. Craig Rucker, President and Co-Founder

Dear Craig,

- I agree!*** The upcoming UN climate conference in Dubai is all about implementing an extreme “Great Reset” agenda to achieve a worldwide government-controlled society – based on socialism, of course – where “consumerism” is abolished, energy independence is a forgotten dream, our freedoms are severely diminished, and poverty becomes the norm. *We must stop them!*
- I agree!*** On November 30, just a few weeks from now, the United Nations and the Green Left will be pushing the most extreme elements of their climate panic agenda. The world’s media won’t question them, but I know you will. CFACT must be fully empowered to send a top-notch delegation to COP28 and bring all its strategic assets to bear in an effective, massive public education campaign to debunk the phony science of the climate alarmists – *and I am proud to help!*
- I agree!*** CFACT’s vital mission to expose the plans of President Biden, the UN, and the climate-doom Left to transform our society deserves my fullest support. Please accept my tax-deductible, special rush donation today in the amount of:

\$25 \$50 \$100 Other: \$ _____

Payment method (*please check one*)

My check is made payable to: **CFACT**

I prefer to donate by credit card:    

Account Number

Security Code Exp. Date

Signature

Email / Phone (*optional*)

Paid for by the Committee For A Constructive Tomorrow.
All contributions are tax deductible to the fullest extent allowed by law.
