**cc:** State of Washington US Representatives and Senators

What we need to do is remove the self imposed personal and municipal corporation liability cap on all states and the union of the states for the legislature, executive and judicial branches to get rid of all you crooks stealing our property. You people need to live by the same higher laws of the land everyone else is under, i.e. the Laws of Nature and Nature's God, the Declaration of Independence and the intent and success of the American Revolution.

At least the oil companies are providing a legitimate product to the free market. CONgress and all the state houses have done much more damage to the natural born and our private and public property based on needless agenda junk science and uncountable other illegitimate acts, than ALL the oil companies and mining COMBINED.

You people are operating a chain of syndicated rackets through a hierarchy of criminal municipal corporations in all the states, counties and cities which are clearly chartered to war on the very people who you were sworn to protect. Yet you put out this endless nonsense below trying to make yourself heroes while not stopping the fundamental causes of the problems you have created in the first place. You are playing a shell game with the lives and property of the natural born free and sovereign state Citizens. You are extorting good businesses and corporations, riving them out of the state, e.g. The Boeing Company with one hand, while the other hand extorts the natural born state citizens into legal, financial and environmental nonsense with criminal allowance of usury, regulations, taxes and

Financial Fraud: The Tip-Off  
=====

"Tell me why I'm so lucky!" This was the challenge hurled by the head of Capital Markets of my former Wall Street firm at any trader who booked a profit. My partner, who ran our trading business, had the Head of Accounting sitting outside his office and he tracked the firm's securities operations like a hawk. Since perfect markets have the profits squeezed out of them, a reported profit demanded an explanation. Why were we so lucky?

11/1/2010

My former partner lived the first rule of avoiding financial scams: understand where your money is, what it is doing, and the logic of your profits. If you don't understand, if it does not make sense to you, if it does not reflect how the real world really works, then it is prudent to assume you are dealing with fraud.

There are a few basic rules that will help you protect yourself from most financial frauds. Consistent returns were the dead giveaway that something was fishy at Madoff's operations. Consistent returns, however, are a siren's song for investors who want to prosper inside a financial bubble.

Madoff raised funds through intimate networks. Critics say this is why you would not bank and invest with people you know. Rubbish. You need to know who you bank and invest with. You also need to know what they are doing with the money. Black boxes are usually frauds -- whether by individual investment firms or by the partnership of the Treasury and central bank.

**Calling for Payments, Not Promises**

On Tuesday, I spoke on the floor to urge the Senate to move forward with eliminating the liability cap on big oil companies for covering the cost of oil spills. I also called on BP to put forward \$20 billion to set up an immediate fund for cleanup and damage compensation.

11/1/2010

for TRIO funding because of a technical error in their application. This call came after I personally called Secretary Duncan and sent multiple letters with Senator Maria Cantwell, asking that the Department of Education allow SCCC to compete for the funds which they had received for over 30 years. TRIO funding provides critical support services including counseling, tutoring, mentoring, and financial guidance to low-income students.

### **Veterans: Honor our Fallen Soldiers with Proper Burials**

On Monday, I sent a letter to express my dismay over the mishandling of graves at Arlington National Cemetery. This letter follows an investigation conducted by the Department of the Army inspector General that found over 200 mismarked graves at the National Cemetery. My letter calls on the National Cemetery to remedy their mistakes, and urges the Departments of Defense and Veterans Affairs to closely examine their procedures and practices to ensure these burials are always properly handled. - **Details**
