Dear Dr. Soon:

Thank you for your kind words and permission to use your presentation with qualification that it is my interpretation.

It is one thing to fight this battle against the green extreme and to read about the horror stories and another to hear directly from those who are being persecuted for telling the truth.

Have you seen the liberal online dictionary Wikipedia comments about you? Notice they mention some of your funding in part as the oil companies but they do mention funding sources for the Al Gore or probably any other who is spreading the green propaganda. There is an excellent repute in the discussion tab by a very astute reader.

"In 2007, Gore was awarded the Nobel Peace Prize (together with the Intergovernmental Panel on Climate Change) for "efforts to build up and disseminate greater knowledge about man-made climate change, and to lay the foundations for the measures that are needed to counteract such change." He is also the author of the 2006 text, An Inconvenient Truth on the topic of global warming and starred in the Academy Award-winning documentary An Inconvenient Truth, released in conjunction with the book. He helped to organize the 07 July 2007 benefit concert for global warming, Live Earth."

You notice they do not attack Gore for all of his lying, lack of credentials, funding sources for the "Inconvenient Distortions", et al. The Nobel "Peace" prize is a sham and a and a shame upon that organization. It should be a Nobel PIECE prize, i.e. a piece of our our private property is given up for all the blatant out of context and down right lies he is
Also Wikipedia says nothing of the overwhelming government funding bias toward their man caused global warming agenda. They conveniently leave out how one sided the UN UN climate control agenda is. They should be asking why is the national and one world government crowd driving us further into debt pushing a one sided lie.

It seems to be OK for government to spend billions on this green Ponzi scam but it is not is not good when the energy industry stands up and fights back with some token funding. funding. I'm surprised the energy industry does not fight back harder considering how much of our energy has been shut down on this green nonsense.

This government is upside down and backwards, Dr. Soon. I am hoping the internet is going to save us by giving us a tool to spread the truth far and fast exposing and squelching all this propaganda.

I hope a new employer appears on your horizon that will not threaten you and your family. You deserve to be rewarded for all your hard work especially walking the plank spreading the truth of this green debauchery.

This positive feedback paradigm of government grant funding has to be exposed for the bribery it really is. People will do anything and say anything for money. It is a crime that that the sovereignty of the states and the free born state Citizens have been broken with all all these adhesion contracts devised by the collectivist.

I know you will continue to speak out and steer the green herd into the light of the truth. truth. Treachery can only grow in the dark. These are the end times for contrived agendas. Junk "science" can no longer be held in a box with the world wide web and a growing activism for freedom and liberty. Thirty years from now, we will look at these times as the Salem Witch Trials.
In 1697 Samuel Sewall, one of the judges in the witch trials publicly confessed to the wrong doing he had helped to escalate, and offered an apology to the relatives of those who had died. The matter has never been allowed to die however. In 1706 Ann Putnam apologized for her actions during the summer of 1692. In 1711, a bill was passed through the legislature that restored the names of those accused, and gave £600 in restitution to their heirs - this included money for those like Dorcas Good who never recovered from her ordeal and required to be looked after for the rest of her life. In 1957 the State of Massachusetts formally apologized, and in 1992, a memorial to the witch trials was dedicated in Salem - now renamed “Danvers”. Those who died needlessly have not died quietly. Their memory lives
on, not only in the minds of their relatives of all ages, but also those who strive to prevent such an atrocity happening again."

I was cautioned by another property owner to be careful and take care of my family first as those involved in this green government movement are ruthless.

Thank you again, Dr. Soon, for all you have done.

Jack Venrick
