So sorry I won't be able to post your fine works on Land And Water USA, and it'll be nearly impossible to respond to your emails for quite some time. Chuck and I were hit pretty bad by the Northern CO flood. It could be many days before cleanup begins, and likely to take a month.

To our friends downstream (eastern CO and on into NE) on the Platte - PLEASE be careful; river's still rising!

Friends offers to help have been overwhelming and greatly appreciated. Bless you.

We'll try to post updates on my fb -Roni Bell Sylvester.

Thankfully, we and our livestock are safe!!

Again, please accept our apologies...

Thank you,

Roni

PS: FACT! This flood would not have been this magnitude had environmentalists (eco-terrorists), government and greedy bastards not blocked dam building and not artificially manipulated the S. Platte flow!
