“As a scientist and writer, I have been fighting the global agenda that would destroy America as we know it for decades. As a researcher in the American paper industry, I ran a multimillion dollar research project on the effects of acid rain. When the results came in that it was basically a non-issue, I was told to quash my results or find a new job. That was when my eyes were opened to the fact that it was politics driving the science and not the other way around.

In 1994, myself and a few other individuals stopped the cloture vote to move forward to ratify the Convention on Biological Diversity Treaty which would have destroyed property rights in our country, thereby destroying free enterprise, the American way of life, and ultimately Freedom itself.

That is the goal of the Globalists. It is not “saving the planet,” it’s not even redistribution of wealth ultimately. It is Control. Global control of everyone and everything. Together with my wife and all who have worked with us, both as colleagues and as fellow warriors in the fight for freedom, we have labored to inform citizens and policy makers, and to stop this agenda.

To all of you who read this, I say this, don’t give up. Keep fighting. Keep working. Keep doing whatever it is that God has called you to do.

For me the fight is over. After a 2 ½ year battle with cancer, I am going Home. My time here is almost over. I thought I had more to do, but God is saying otherwise. Thank you to all who have fought and are continuing to fight for freedom.

Therefore, my dear brothers and sisters, stand firm. Let nothing move you. Always give yourselves fully to the work of the Lord, because you know that your labor in the Lord is not in vain. 1 Cor. 15:58”
