Subject: Please Support Montana SB 97

American traditional way of life is under attack along with our fundamental and founding laws of the land. A tide of taking of property rights through increasing compulsory regulations, tax taking and usury with the support of global agendas like UN Agenda 21 and 2030 are rolling across America with the help of the benefitting globalists and non government organizations.

This action to undermine the will of the people began immediately at its founding. The First Judiciary Act of 1789 was declared unconstitutional by US Supreme Court in Marbury vs. Madison - <http://www.infoplease.com/us/supreme-court/cases/ar20.html>

The courts must be reigned in now. We have kicked this can down the road to the doom [of our 70 some unalienable rights](#). Montana SB 97 is one giant step for "We the People" and one small step to free us from the ever present and growing legal tyranny of the global to local courts, judges and lawyers and the non government organizations that use the courts for profit and power.

There are at least 221 judges in Montana, see break down below.

- City = 88
- District = 46
- Justice's Court = 65
- Municipal = 9
- Water = 5
- MONTANA Workers Compensation = 1
- Supreme Court = 7

I also count some 3,679 Federal judges and some 27,179 State court judges in America for a total of 30,858 who largely decide by their own personal political bias. Plus the legal profession is being educated from largely very pro government universities and colleges because academia is heavily subsidized. Hillsdale College is the only private college that refuses to go to the federal and state pig trough and eat the slop of "obey or we will cut your funding".

Please check out links below of decades of my research regarding the predatory trend of American laws, courts & enforcement cereal agencies usurping American unalienable and property rights:

It is imperative we pass Montana SB 97 to stop all judges, courts, lawyers, politicians and non government organizations (NGO), especially foreign NGO's and academia who are increasingly trying to seed their pockets and power by using foreign & UN laws.

Sincerely,
