**Subject:** Re: All The Kings Horses and All The Kings Men

Jack:

Do the numbers. The total budget for King County is around \$3.4 Billion. The Employee portion of that exceeds \$760,000,000. There are approximately 1,700,000 people who live in King County, one third of which live in Seattle, with their own taxes and budgets.

\$3,400,000,000 equals exactly \$2,000 for every man, woman and child that live in King County. The cost for just King County employees is \$447 per man, woman and child. I don't know what the Seattle budget is or how many employees they employ, but it isn't difficult to come to the conclusion that government is way out of control. But then so are the people who demand all the services from government that government is so willing to provide, using our money. The dignity of these hapless people have been bought and sold for a few pieces of "OUR" silver.

And you wonder why government is growing? We have met the enemy and it is US. And these hapless people mostly live in big urban centers like Ho Chi Min City of Seattle that the environmentalists want us to live in.

I can only hope that one day, the HAVES will finally have had enough of supporting perfectly able HAVE NOTS and shut off the money spigot.

**There are 15,124 King County employees sucking our life force from our land and savings. Thanks to Louis Bloom who requested the data via a court decision on the county forcing them to produce this public information. Louis has an interesting site & has done us all a service making this information more available. You can see the legal links**

Clicking on the above picture will take you to a page about the webmaster.

A freedom of information letter template is at <http://www.splc.org/foiletter.asp>

Washington State newspapers have detailed information about access to public records at

<http://www.openwashington.com/>

Here's information on Washington State websites about counties, ports, school districts, cities, ect...

In Nov 2002, the Wa St Court of Appeals, ruled that government employees names cannot be kept secret.

These webpages were uploaded for my amusement, but also for these reasons.

e-mail--- welcome

here's some e-mail questions, comments, and my replies

**You can see what happens when we do not limit government.**

**Boeing has a great model for reducing headcount. During my 30 years**

11/4/2010

Boeing I would watch wavea of budget cutting move through every 4 to years cutting all the " empire building" and non performers who had in over the last good business cycle. Boeing went from 112,000 in 1969 to around 37,000 in a couple years and in even larger reductions that longer lately.

No private sector business would come close to this level of fat as King County government, competition would eat them up. You can see how government consumes small property owners and businesses.

You know their is a major problem in this state when an aerospace giant like Boeing leaves because it is mistreated as the rural land owners. This why corporate America is leaving America. It is now the Government of America, of the Government, by the Government and for the Government.

Property owners, businesses and farmers who use to be the city government are now being preyed on by their government. Big government feeds on U.S. They are larger, more wealthy, faster growing, more inflexible, more unresponsive to their citizens, more litigious to their property owners and citizens, more brutal than ever before and more shielded within their government fortress.

To break down " walls" Boeing threw their first level management out of their offices into the areas with their people. They were forced to be

11/4/2010

to their own people. To break "fortress building", Boeing also tore most of the functional organizational and facility walls that separated into isolated ivory towers. They forced Engineering, QC, Finance, etc. to work next to each other and to look at each other and ways to solve their problems.

This needs to happen in King County government. "Executive" Ron and his minions needs to be thrown out of his ivory towers to live and with the small property owners who they steal from. All the council to be thrown out into the areas where they serve without an office or They need to roam among the people who they serve, over regulate and steal property from and learn from the people they serve.

The radical environmental zealots need to come out to the rural areas live and work and plow our fields and plant and get their hands and feet dirty and cut and their back sore.

All the staff that serve these kings and queens in King County need to be cut down to the bare bones. It should be back to basics. Then must be retrained to respect and honor its property owners not to steal from and mistreat them.

Legislation needs to be passed that prevents government and environmental groups from doing business or even talking to each other. If government was a private business it would be brought up on

11/4/2010

antitrust and unfair competition and operating as monopolies.  
out competition, play favorites with radical environmental groups like  
WEC, take away private sector jobs, use gouging, price fixing, heavy  
handed penalties and litigate anything that does not serve their agenda.

It is time for some major changes in our government. There is a war  
on now on our borders, our language and our rights to show our  
history in public and the taking of our land. Zell Miller and U.S.  
owner know who are creating these problems, they are "A National  
No More" .
