Subject: UNA 21 still tops the tyranny charts

U.N. Agenda 21 is the vehicle being used for Global Dictatorship.

If you have heard of Agenda 21, i.e. "Sustainable Development" then all the legislation being shoved through Congress makes sense towards the end goal to:

- Abolish private property
- base world governance on public decree, not individual rights.
- Reduce human population.

This is definitely something you can act on at the local level. Agenda 21 has a significant head start and there are a combination of public and private partnerships that moving towards that direction.

The most recent "Livable Communities Act" legislation introduced by Chris "Crook" Dodd who is retiring and therefore can do it without repercussions is designed to formalize this plan with freedom-killing legislation.

YOU CAN ACT AT THE LOCAL LEVEL TO STOP THIS!

This is an excellent website full of information on Agenda 21 and the local private/public partnerships that are moving in that direction.

There's brochures you can either download or order and Action Plans on what to do at the local level.

We all must do more than talk and blog. We must take action every day whether it's talking with other people, calling, writing and faxing our Congressional representatives and VOTING!

I saw a couple of notes on this blog that one of the best things to do would be to not vote. Are you kidding???

How else do you expect to restore our Constitutional Republic if you don't vote????

Please take action to stop Agenda 21.
